

## Clicker Questions typing

- Trade in/upgrade plan?
- Variety of abilities?
- Do we need them if we have open network and kids can bring tablets/computers?
  - best way to spend \$\$

## Turning Point/Assessment Technologies/Easy Graphics Corp

- 70% of higher ed business (UT, BG, OU, OSU, UC, MU, KSU)
- could have 2 receivers in one room with different channels
- receivers have 250 foot radius, need not be line of sight
- keypads have sleep mode automatically built in to save battery
- all receivers work with all devices
- handhelds, ipads, computers, phones
- have available download (free) for Ppt to help build polls
- also have floating toolbar "TurningPoint AnyWhere"
- "Turning Key" gives ability to do tests, quizzes, homework
  - answer key software
  - use paper test, collect answers & grades
- These three (above) products are included in cost (actually free downloads for anyone)
- Can pre-assign names, but only one at a time
  - can use participant list if using with more than one student a day
  - if using phone or computer can have name already assigned
- Authoring content is a 3 step process using Turning Point toolbar
- TP AnyWhere
  - can use with any program
  - acts like floating quiz (=don't need to be in Ppt to use)
- Partner with
  - Bbd right on the tool bar to integrate
  - Study Island
  - State of Ohio past OAA/OGT questions
  - Moodle
  - ExamView
- Prof Dev
  - custom, online self paced courses
  - Onsite training
  - Boot camp-train the trainer
  - on line tutorials
  - teacher help line 7 am - 9 pm (hot-line to corporate (in YT))
- Life expectancy 3-5 years
- Student or school can buy a license per non-clicker device
- one clicker is same price as a 4 year license for a phone (or similar product)
- Radio/USB receiver is separate purchase]
- Licenses come in 1, 2, 3 or 4 year terms

- Online pricing: 4 year LICENSE: \$40; (handheld) receiver \$66)

---

### CIM/CPS/eInstruction

eInstruction is the company that owns ExamView

- seamless integration with ExamView
- has three products
  - CPS IR--infrared, y/n, t/f, m/c
  - CPS Spark--m/c, y/n, t/f
  - CPS Pulse--m/c, y/n, t/f, extended response (up to 140 characters)
  - Spark and Pulse can be used in same environment
  - iPad, iPhone, Bberry app...web based virtual clicker
  - any web enabled phone can login to software
- ExamView Assessment Suite **comes with the purchase** of any of the CPS clickers, district license (full up to date version) *\*\*would this be better with Bbd integration for Bbd test program???*
  - when using ExamView you can use a feature to bring up multiple variations of the same question
- “Fast Grade” allows you to create an answer key for a paper test
- OAA/OAT test banks built in for training purposes...download from CPS site
- You don't **have** to use Ppt, work with the things you already have
- Prof Dev
  - on site PD...2 or 3 day hands on training
  - web based (webinars)
- Warranty: 3 years
- Exports currently to Angel and WebCT, are working on relationship with Bbd, but it is not concrete yet.
- OAA test questions: [www.screencast.com/users/CIMohio](http://www.screencast.com/users/CIMohio) go to PC CPS databases
- prices based on 24 response systems
- licenses available for web based response (students can purchase)
- working on an upgrade/turn in plan

---

### Qwizdom :

- working on Bbd integration
  - currently a work-around
- do not have direct integration w/ Examview, but can work with program other ways
- do have direct integration w/ Study Island
- Ways to Use
  - screen based (existing apps)
  - paper based
  - floating “on the fly” toolbar
- Use Radio Frequency only (first co. to use)
  - one USB R/F host that each response system connects to
- Three remote choices
  - Q2 (elementary level) t/f, rating scale, m/c

- Q4 (ele, ms) t/f, y/n, rating scale, multiple mark sequencing (not used much now)
- Q6 (ms, hs) (pretty much replaced Q4), large LCD can put question on remote, t/f, mc, text input and edit
- Two instructor Options both can support 1000 remotes
  - Q5
    - navigate b/w slides, display results graph on LCD screen
    - Project results to whole group
    - Display audience help request log (help button for single user)
    - pose spontaneous question
    - randomly select participants (puts random student name on board for answering question)
    - pause and play media
  - Q7
    - interactive whiteboard capabilities
    - wirelessly create, annotate, and interact w/ screen objects
    - run computer apps with programmable pen keys and hard keys
    - view presenter notes
    - (works like mimio pad)
    - integrates with Microsoft PP
    - integrates with any application /floats over slide
    - 2 step process
    - students cannot change answer on Q2

= Paper-based mode

- enter existing class worksheets, paper-based tests, and text
